WORK EXPERIENCE

Associate 2 - Data Engineer

PwC India

May 2026 - Present | Kolkata, India

Accomplishments / Tasks

- Working as an Azure Data Engineer for PwC India Clients.
- Using cloud-native data platforms to deliver end-to-end data pipelines and analytics infrastructure for clients.

Sr. Analyst - Data Engineer

Capgemini Technology Services India Ltd

Jul 2024 - May 2026 | Kolkata, India

Accomplishments / Tasks

- **Project 1:** Legacy to cloud Data Migration in Azure.
- Migrated 23+ tables and millions of records from legacy **PostgreSQL** to Azure using **ADF, ADLS Gen2**, and **Spark**, implementing a **Bronze-Silver-Gold** medallion architecture.
- Automated hybrid ingestion using **Self-hosted IntegrationRuntime**, enabling secure, append-only data loads.
- Built Spark-based cleansing and **SCD Type 2** pipelines, improving data quality and historical accuracy for analytics.
- Developed and maintained scalable batch data processing pipelines for high-volume datasets, ensuring consistent and reliable data delivery.
- Integrated **SQL techniques, including CTEs and window functions**.
- **Project 2:** Big Data Observability as Support developer.
- Advanced Analytics with **Splunk** and **SPL**.
- Developed Splunk IT Service Intelligence(ITSI) Dashboard for streamlining monitoring alerts and reducing manual effort by 100%.

Analyst - CMDB Data Management

Capgemini Technology Services India Ltd

Sep 2022 - Jul 2024 | Navi Mumbai, India

Accomplishments / Tasks

- Worked on Automation of on premise to ServiceNow CMDB Migration.
- Performed weekly audits for maintaining a healthy CMDB.

EDUCATION

B.Tech, Computer Science and Engineering

Heritage Institute of Technology

Aug 2018 - Aug 2022 | Kolkata, India | GPA : 8.73

SKILLS

SQL

Python

Azure Data Factory

PostgreSQL

PySpark

SparkSQL

DataBricks

C++

SPL (Splunk Processing Language)

PROJECTS

Data Migration (Azure Data Engineering)

ETL - Developer

Data Migration for client based in Netherlands

Tasks / Achievements

- Worked on On-Prem **PostgreSQL** Server data migration from legacy database to **Azure Data Lake Storage Gen2**.
- Implemented **medallion** layer architecture for segregation of raw, cleansed and curated data.
- Improved data processing performance and reliability by leveraging distributed computing capabilities of **PySpark** and **SparkSQL**.
- Designed and implemented automated **ADF** pipeline executions using schedule and event-based triggers, incorporating activities like **Copy, Mapping Data Flow, Lookup**, and **ForEach** for dynamic data processing.

Bayer, CSL Behring, Carnival (Splunk Developer)

Splunk Developer

Tasks / Achievements

- Developed and maintained Splunk dashboards, reports, alerts, and visualizations.
- Integrated data sources into Splunk for real-time and historical analysis.
- Conducted anomaly detection and capacity prediction to limit resource crunch using Splunk tool kits.
- Hands-on experience with Splunk, including **ITSI**, advanced **SPL** (Search Processing Language), and dashboard development, along with applying machine learning techniques for monitoring, anomaly detection, and data-driven analytics.

CERTIFICATES

Microsoft Azure Data Fundamentals (DP-900)

Sep 2024

Microsoft Azure Data Engineer Associate (DP-203)

Dec 2024
